Manager Job Change—Current Data View

Manager Maintenance – Maintaining manager organizational relationships can be tedious and labor intensive, especially when utilizing PeopleSoft Manager self-service. With PS WebSolution's Manager Maintenance Package Service, keeping organizational hierarchy is seamless and automated. When a supervisor or manager is terminated, on leave, or transferring to a new department, Manager Maintenance will update all affected employees as well as update security.

Manager Delegation – Manager Delegation allows a manager to assign MSS access by department or employee of their direct reports to an authorized delegate. Delegation can also be divided up by application, application role (Salary Change vs Job Data Change only). Delegation includes manager review and security to ensure data is only enacted by the authorized delegates. Both solutions are fully integrated with existing PeopleSoft Manager eApplications as well as PS WebSolution Package Service applications.

Job Action	Job Action Description	Action	Reason Code	Transaction Name	Bonus Indicator	Monetary Indicator	Business Unit
1	DEM	Demotion	DEM	INV	FT1_JOB_CHG_MON	<input checked="" type="checkbox"/>	Update
2	DEM	Demotion	DEM	TVT	FT1_JOB_CHG_MON	<input checked="" type="checkbox"/>	Display-Only
3	HRS	Work Hours Chan	PAY	DHR	FT1_JOB_CHG_MON	<input checked="" type="checkbox"/>	Hidden

Manager Job Change Configuration Module (CAM). Allows administrators to fully control Job Change setup, configuration, display, field requirements, GUI, workflow routings, Salary change restrictions

PS WebSolution Manager Job Change – Looking for a simple, fully automated and configurable manager self-service application to replace all your online manager Job Data transactions? PS WebSolution has created a single, user friendly Job Change application that allow managers to perform almost all Job related changes. Features include workflow routing and approvals, a Configuration and Administration Module (CAM) page to determine field display and requirement options, routing paths, transaction names, action reason mapping as well as salary constraints and messages.
